

Energy Management Policy

Data Respons Solutions recognises the importance of effective energy management to improve environmental sustainability

Our overall energy management objective is to contribute to environmental sustainability and the achievement of global climate change targets by reducing the environmental impact of our energy consumption.

Energy Management goals

- Comply with legislation and regulations
- Increase energy efficiency
- Reduce footprint
- Decrease consumption
- Save costs

Energy Management Targets

We have defined and will monitor the following targets:

- 1** **Switch to guaranteed green electricity.**
All offices and data hosting centres have been given a mandate to switch to guaranteed green electricity (Guarantee of Origin).
- 2** **Reduce energy consumption in leased premises**
Influence property owners to install energy efficient systems and energy efficient and energy saving equipment that reduces overall energy consumption.

When moving offices. Move into office buildings that have energy efficient systems and energy efficient and energy saving equipment that reduces overall energy consumption.
- 3** **Increase employee awareness.**
Instruct employees about the importance of their contribution in reducing energy consumption.
- 4** **Energy efficient procurements**
Encouraging the procurement of energy-efficient products and services, and design for energy performance improvement.
- 5** **Improve Energy Management in the supply chain.**
Monitor and improve energy management in the supply chain.
- 6** **Continuously improve the Energy Management Policy .**
Continuously review our Energy Management Policy
